Oak. Blanda 1		

(If not listed above, use 0 and make no upward adjustment.)

OPTIONAL NEW RULE: Weather Conditions: This time of year games played in northern cities are often very much affected by adverse weather conditions. If you wish to add this extra bit of realism, do the following for games played in Cleveland, Minneapolis, New York, Kansas City and Baltimore:

1. Compute both team's Net Play Factors in the usual way.
2. Then, reduce both team's Net Play Factors by one (1) on Plays # 4,5,6,7,10,13,14,16,17,18, and 23. Increase both team's Net Play Factors by one (1) on Plays # 8,9,20,21, & 22. Other plays are not adjusted.
