

To print the Rule Book

Go to File – Print and under the Page Handling Section Click the drop down menu by Page Scaling and select Booklet Printing, make sure it says Both Sides under Booklet Subset, and press OK.

Every file can be printed in color or black and white, however, they are set to color so to print in black and white simply chose to in your print options.

Another option is to laminate your cards. This comes in handy when using the backsides and you may simply use a dry erase marker on the score cards instead of printing new ones.

The first six 'pg' files are all that is necessary to play the game.

The card back files are optional backsides to all of the game cards excluding the score and bowler reference cards.

Print 'ex8' and 'ex9' each twice to have enough backsides for each team.

Make sure to set the printing style to portrait.
